## Design

Our development and construction team has many years of experience in the field of designing tools and fixtures, as well as solution expertise for various process optimizations in the industry.

For years, we use CAD software Inventor and are therefore able to process all common data formats.

## Production

Our own production facilities enable us to be highly flexible. The production of individual parts is carried out based on 3D CAD/CAM data.

The data is read directly from the design department. This way of working has great benefits.

With advanced CNC machinery and equipment, we offer you the highest standards of today's production technology.

### Performance range

- ✓ Check fixtures
- ✓ Gauges
- ✓ Bending gauges
- ✓ Check fixtures with sensor technology

## Quality

With our Mitutoyo 3D measuring machine we are able to measure the fixtures directly after production.

A measurement report is made according to the specifications of the customer.

Measuring machine:

Mitutoyo Crysta Apex 5 9208

Measuring range: 905 x 2005 x 805mm
